

# Avici 1150w vs. LumiGrow TopLight

LumiGrow's TopLight produces 28% less light than the Avici, has no programmable spectrum and a rated life less than one third the life of the Avici.

## Avici

vs.

## TopLight

**2300 uMole/s**

39% brighter, grows more weight per square foot.

PPF

**1650 uMole/s**

28% less light.

**52 cents / uMole**

\$1,199 / 2300 uMole = \$0.52 / uMole

Cost of Light

**Unknown / uMole**

Price needs to be under \$858 for same value.

**1150w**

Power

**685w**

**Fully Programmable**

Avici has programmable spectra and a remote controller making it suitable for all phases of growth.

Spectrum

**Single Spectrum**

The LumiGrow TopLight has one spectrum option and can not keep up with spectrum research.

**\$1,199 MSRP**

We offer state of the art lighting at market disruptive pricing.

Cost

**Unknown**

LumiGrow requires a quote to see pricing. The TopLight would need to be under \$858 to be value competitive with the Avici.

**34 Years or 150,000 Hours**

Avici has parts rated for 34 years. LED life is typically 55,000 hours when run at "book" temperature. Avici runs cooler so lasts 3x as long.

Lifetime

**Not Published**

Information not available, but their BarLight is rated for 50,000 hours, which is low for industry standards and less than one third the 150,000 hour rated life of the Avici.
