

The image features a white and black AVICI device with a grid of red and blue LEDs. It is set against a background of vibrant, swirling smoke in shades of blue, purple, and red. The device is positioned in the upper half of the frame, with the smoke billowing out from behind it.

PROGRAMMABLE SPECTRUM
CHANGES EVERYTHING

PROGRAMMABLE SPECTRUM CHANGES EVERYTHING

Spectrum is the most influential factor in plant development. By adjusting the ratio of colors, cultivators get precision control of their plant's full genetic potential.

- Fine Tune Development

Spectrum Controls Growth

LIGHT SPECTRUM AND CHEMICAL EXPRESSION

A plant's chemical composition influences its color, flavor, aroma, and psychoactive effects. The Avici's programmable spectrum gives cultivators the power to fine tune development and unlock the plant's full genetic potential.

Target Chemical Expression

A programmable spectrum gives cultivators the tools to enhance chemical profiles for specific end uses.

Target Development

Strategically adjusting the spectrum can dramatically alter the way a plant looks, smells, and tastes, giving large scale cultivators craft level precision.

EASE OF WORKFLOW

Change seasons at the touch of a button.

ADAPTIVE FUTURE-PROOF SPECTRUM

Always Up to Date.
Always Competitive.

Lighting is the most important investment in a cultivation facility; every reaction in the plant is driven by light.

As cultivation science improves, change your spectrum with the push of a button, rather than changing lamps.

Technological Flexibility

LONGEST LASTING

150,000 Hour Rated Life

How Do We Know?

We use OSRAM's diode specifications and NASA's soldering standards to calculate our rated life.

Reliable

The Avici Series has a 150,000 hour life, three times industry standard. Cultivators can trust in the superior reliability of a high rated life.

Higher ROI

Avici stays brighter for longer, growing more cannabis and continuing to pay for itself long after other fixtures need to be replaced.

AVICI^{HB}

High Bay Application

2400 μ Mole/s

The Avici provides better development and **higher yield**.

1150w

Better than 1:1, the Avici is **brighter** than an HPS DE.
