

# RLC-1

All Digital Lighting Controller

## Features

Built in sunrise and sunset functions.

Automatically dims lights during overtemperature events.

## Compatibility

The RLC1 uses a low voltage digital data stream to switch, dim, and boost any Revolution, Phantom, MaxiBright or other ballasts equipped with a Revolution-style RS-485 data port.

## Spectrum Control

The RLC-1 gives cultivators seasonal presets for Clone, Veg, Flower, and Finish, as well as the option to customize the spectrum with an intuitive interface.
